

## ■ MS100N2 1/2"

➔ 30-150 Nm Insulated non reversible ratchet torque wrench 1/2" square drive

### ▶ STANDARD(S)

EN 60900 / IEC 60900 / EN 6789

### ▶ USE

For precision tightening (clockwise only) .  
Adjustment of the tightening torque is made by turning the pivoting handle.  
When the tightening torque is reached, the torque device trips at the optimum limit and resets automatically.

### ▶ SPECIFICATIONS

Each tool is marked with a serial number for traceability and delivered with a calibration certificate.
